

Northwest Orange County Areawide Transportation Study (NOWOCATS)

PROGRAMMED AND PLANNED IMPROVEMENTS

Programmed improvements are projects that have moved into the short- term work program, usually within the next 5 years. These projects have been assigned funding for design, right-of-way, and construction.

Planned improvements are projects that have been identified as needed in long-range transportation plans, typically looking 20 – 25 years into the future. They identify where roads, intersections, and safety projects are anticipated based on growth, safety, and congestion.

Programmed and Planned Improvements
